“Hidden in View”[®]. Learn to recognize the evidence of harm, violence and trafficking crimes in our patients and our communities.” 2.5 CEU

Synopsis: The goal of this program is to educate an attendee as to the mechanisms and appearances of injuries in children and adults. Focus will be on the common modalities of injuries including non-intentional, intentional, patterned and mimickers of injury. Lessons from the viewpoints of dentistry, pathology and law enforcement will be shared with the mutual objective being the earliest possible intervention and interruption of harm to our patients, and our friends and families.

Learning objectives:

- Attendees will learn to recognize and differentiate among accidental, incidental and intentional injuries and will learn about less visually obvious indications of violence and abuse including: acute, chronic, intermittent and historical. Child, adult, elder and intimate partner cases will be discussed.
- Participants will receive guidance and resources on mandatory reporting, when necessary, as a healthcare professional or private citizen.
- Explanations, differentiation and case discussions will be given to educate the attendee as to the criminal acts of human smuggling, and criminal human exploitations of labor and sex trafficking.
