“Red, White and Blue, what does it mean to YOU?”[®] Practical Oral Pathology for the Dental Team ” 3.0 CE

Synopsis:

Oral lesions are a common finding in dental practice. During this course attendees will receive not only a refresher program on the topic of oral pathology, but will also be brought up to date with the most current, relevant discussions of widespread oral pathologies including their origins, treatments and outcomes. The audience will learn valuable insights and techniques that can be immediately introduced into their clinical practice to improve patient care.

Learning Objectives:

- Fundamental overview of the histology and pathogenesis of common and frequently encountered oral lesions, pathologies and the oral manifestations of systemic disease encountered in dental practice.
- Recognition and differentiation of Red, White and Pigmented oral lesions and the scientifically supported protocol for evaluation and treatment.
- Recognition of tissue alteration due to physical trauma or habit, localized disease and systemic illness.
- Learn and implement a succinct yet thorough extra/intra oral examination process into routine dental practice.
